Wilmington NC	Fri / Fri			10	11	12	14

With this new rotation, we aim to increase our service reliability, as well as to be able to offer a better transit time out of Costa Rica, keeping the advantage of our direct service from Guatemala and Honduras into the US, UK and Northern Europe, always with a competitive transit time.

The day of departure from Costa Rica, on Sundays, allows producers to harvest the whole week, and the day of arrival in Tilbury and Rotterdam has been advanced to Monday and Tuesday respectively, which provides an important logistic advantage for the delivery of the goods at destination side. Transshipment cargo will also benefit, as for instance our transit time to Saint Petersburg will be of just 22 days and to Dublin in 19 days.

In regards to the cargo from Europe to the Caribbean, the inclusion of a direct call to Dunkirk will offer new opportunities to our clients, providing them now with the fastest transit time to Fort de France and to Pointe a Pitre available in the market. From Radicatel (Le Havre area) transit time will be improved by one day.

There will also be improvements in our transit time from Rotterdam to Curacao and Aruba, making it in 14 days to Willemstad and in 16 days to Oranjestad, one day faster than before.

For more details, please don't hesitate to contact us either directly or through our network of local agencies.

Best regards,
Your StreamLines team.
